

# Vinyl Decal

The vinyl decal consists of a top sheet, the decal and a backing sheet. For best results, clean your surface with methylated spirits or similar. Allow to dry.

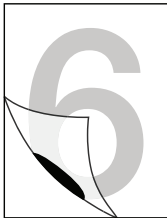

**Tip:** Make sure the decal and the surface are at least room temperature before applying, as cold vinyl won't bond to cold surfaces. You can gently warm the area with a hairdryer on a low setting to help it adhere.

After application of the vinyl decal, leave to adhere for 24 hours prior to washing, wiping or any type of cleaning.

1

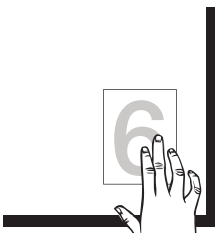

2

Press the decal (over the top sheet).  
Slowly peel off the top sheet. Ensure the decal stays attached to this top sheet as you peel it off the backing sheet.

Carefully align the decal (still attached to the top sheet) over the surface you are going to apply it to.

3

4

Press the decal (over the top sheet) onto the surface and firmly rub the top sheet to ensure the decal sticks well to the surface.

Starting from one corner, slowly roll the top sheet back on itself so that it peels away from the decal.
